

Customer Quotes on UltiPro's Strategic HR

“We want our HR team to function like business consultants to city leaders, offering valuable insights and direction on issues, like recruiting and retaining a high-performance workforce, rather than tactical staff who manage forms and input data. With its extensive functionality for human resources and reporting, UltiPro has elevated our HR team so we now can make a difference in the quality of people we hire and the kind of strategic information we share with upper-level management.”
